

Conditional chronology of the named two-slope ordered branch

Externally supplied calibration: $H_0 = 67.4 \text{ km s}^{-1} \text{ Mpc}^{-1}$, $t_0 = 13.980496 \text{ Gyr}$.
The separate BC03 clock fit ($H_0 = 68.586 \pm 3.949$) is not used here.
Neither calibration is a universal P1-P6 prediction.
