

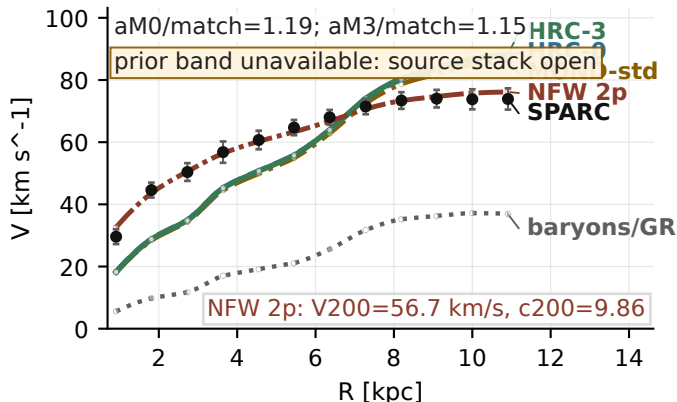

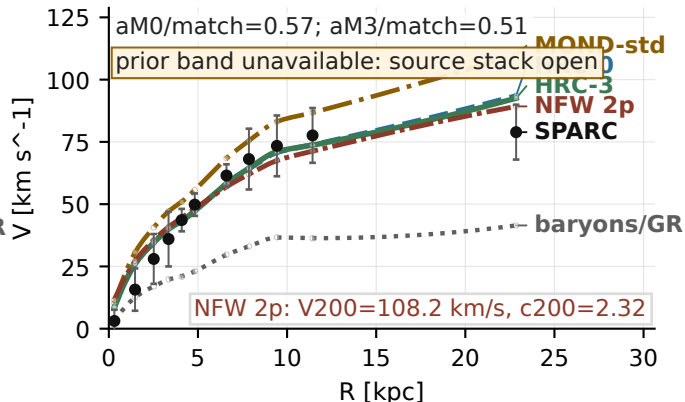

fig19_a: frozen acceleration-stratified SPARC gallery
 Selection unchanged; HRC uses per-galaxy fitted aM with fixed $M/L=0.5/0.7$.

- SPARC observations — MOND-standard — HRC-3
- baryons / weak-field GR — HRC-0 - - - NFW two-parameter fit

Lambda-CDM-motivated free NFW fit; fitted to the displayed rotation curve;
 not a unique Lambda-CDM prediction. No population-prior band is drawn.

Level C algebraic comparison; fitted curves and descriptive metrics are not model-selection claims.
