

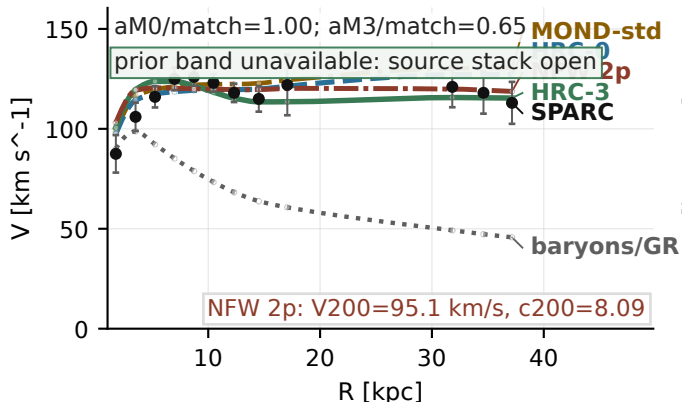

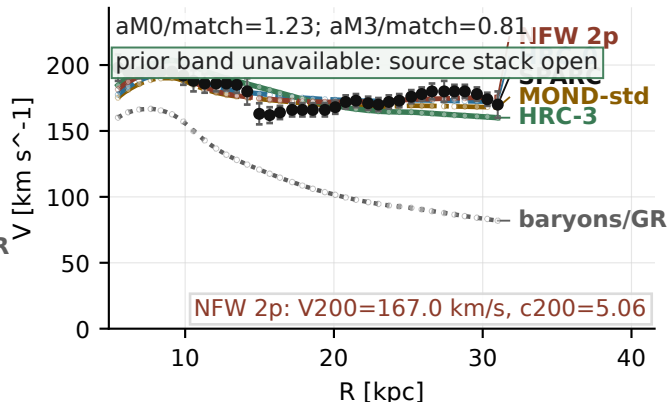

fig19_c: frozen acceleration-stratified SPARC gallery
 Selection unchanged; HRC uses per-galaxy fitted aM with fixed $M/L=0.5/0.7$.

- SPARC observations
- baryons / weak-field GR
- MOND-standard
- HRC-0
- HRC-3
- NFW two-parameter fit

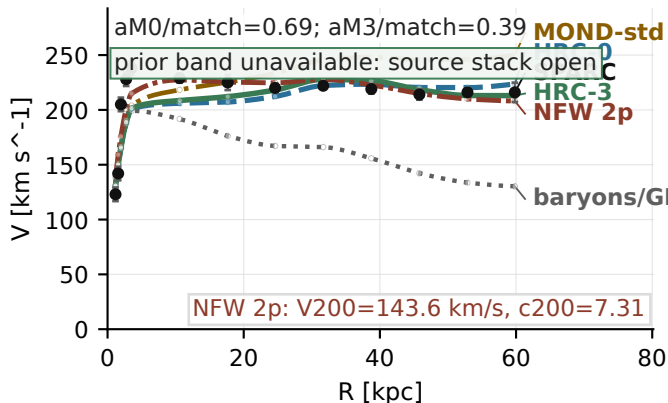

NGC3769 — HMF mean-domain: IN

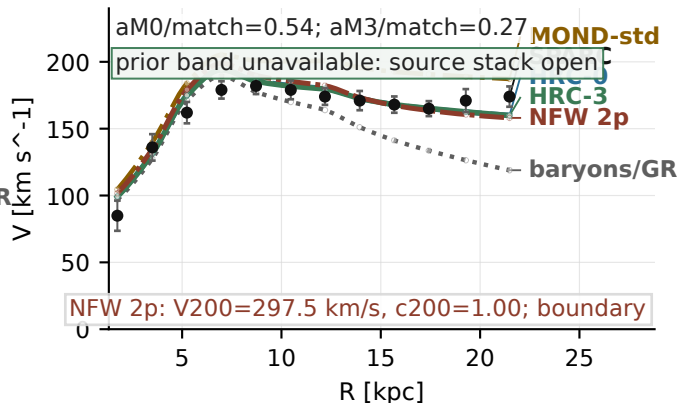

NGC4013 — HMF mean-domain: IN

NGC0801 — HMF mean-domain: IN

NGC4088 — HMF mean-domain: IN

Lambda-CDM-motivated free NFW fit; fitted to the displayed rotation curve;
 not a unique Lambda-CDM prediction. No population-prior band is drawn.

Level C algebraic comparison; fitted curves and descriptive metrics are not model-selection claims.
