

ECT: schematic full evolution of the ordered-branch condensate sectors and the observable Universe

$\beta = 0.8$, $\phi_0 = -0.10$ (Hubble-priority); $G_{\text{eff}}(z=10)/G_N \approx 1.49$; $\Delta H_0/H_0 = +2.73\%$; $t_0^{\text{ECT}} = 13.02$ Gyr

(i) Ordering / Lorentzian-branch emergence

(ii) Gravitational condensate amplitude sector

(iii) Electroweak condensate sector
