Part I outputs (P1–P6, BR1, DP) §§2–10
Pre-quantum action scale S_0 Level A (existence), §20
$S_0 = \hbar$ (matched) Level B, §20
Coherent phase θ & winding sectors Level A, §20
HJ / continuity decomposition Level A, §21
Canonical organisation & Poisson brackets Level A, §22
Reflection positivity (Gaussian subsectors) Level A, §22
Two-sided Euclidean path-dependence Level A, §23
Robertson–Schrödinger uncertainty (with S_0) Level A, §22
Global vs reduced unitarity distinction Level A, §22
Exchange topology Z_2 from d=3 Level A, §23
Schrödinger-type recombination Level A/B, §21
Ordered vacuum nontrivial Level A, §24
Lorentz algebra & Clifford structure Level A, §23
Unified vacuum response (4 channels) Level A/B, §24
Spectral density ρ(μ²) ≥ 0 Level A, §25
Retarded kernel K(τ<0)=0 Level A, §25
Casimir 3/2 (conditional) Level B, §24
Unruh temperature from correlator Level A/B, §24
Reverse O(3)→O(4) segments admissible Level A, §28
Decoherence & arrow of time Level B, §25
PES: Euclidean stationarity principle Level B, §27
Amplitude ≠ probability distinction Level A, §28
Crooks-type relation & entropy production Level B, §25
Decoherence timescales C_{60}, Diósi–Penrose Level B, §26
Dirac structure (conditional) Level B, §23
Results & regime estimates (Γ anchors) Level B, §26
OS spin–statistics route Q11.1a cand. A (free kernel) Q11.1b–Q11.3 B cond. · Q11.4 open
Compact-U(1) charge lattice Level A
Quantum–classical boundary (Γ_{loop}) Level B, §28
Born rule: RP + Gleason conditional uniqueness Level B
Wigner's friend coarse-graining Level B (interp.), §28
Full Born rule (OP-Q7)
Measurement theory (OP-Q8)
Wider defect sector beyond BR1 Level A, §30
Analogue-lab programme Level A/B, §32
$\pi_2(S^3)=0$: shell consistency check Level A, §30
Fundamental info destruction excluded Level A, §31
Non-factorisable correlations Level A/B, §29
Spin discreteness / Stern–Gerlach Level B, §23
Reverse coherence L→E reopening Programme-level
Dark-sector candidates Level B, §30
Critical shell, horizon thermality & 3-regime structure Level B, §31
Bell/CHSH toy crossover Γ=ln√2 Level B, §29
Area-law bound (§31.4) Level A (scaling) / B
Entanglement–tunnelling structural bridge Level B, §29
S_0 from first principles (OP-Q1)
Dominant DM ID (OP-Q10)
Page curve & shell dynamics (OP-Q13)
Bell correlators (Open)
Part I inputs
Derived – Level A
Level A/B
Derived – Level B
Open problem
Strict derivation
Requires assumptions
